RE: Air Conservation Committee Meeting, Peck Mining  
Company, Nephi, Utah

On November 22, 1985, Everett Hooper attended a hearing held at the State Office Building concerning Peck Mining Company's operation located in Nephi, Utah. The purpose of the meeting was to make a decision on the fine that should be imposed on Peck Mining for continued operation under a Cease and Desist Order imposed by Air Quality. The operation produced 5,000 to 9,000 tons of ore per day with a stripping ratio of three tons of overburden per ton of ore causing citizen complaints, for high fugitive dust, to occur. The final decision was to impose a time frame on Peck Mining to have a sprinkling system installed. If Peck Mining failed to meet the schedule, a prearranged fine would be imposed.
